

Elevate your vision with CGI design

MARCH 2025 / VERSION 1

Introduction

At The Environmental Dimension Partnership Ltd (EDP), innovation and excellence drive us forward.

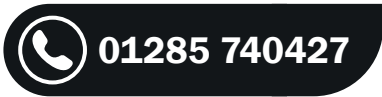

Land East of Wolvershill Road, Banwell: Birds Eye View

EDP have embarked on a transformative journey to enhance our design process with cutting-edge CGI technology. Spearheaded by our specialist urban designers using innovative new software, we have broadened our visualisation capabilities. This now allows us to produce high-quality, photo-realistic imagery and animations.

We'd love to collaborate!

If you're interested in exploring how CGI can elevate your project, reach out to our creative Masterplanning Team using the contact details below:

Philip Dascombe
Associate Masterplanner

Oliver Sharp
Principal Masterplanner

Why choose our CGI services?

Innovative Technology

Utilising TwinMotion software, we create immersive, three-dimensional site models that bring our environmentally-led designs to life.

Versatile Visuals

From site-wide overviews to detailed street scenes, our CGIs illustrate how our masterplanning integrates architecture, green infrastructure, and urban design principles.

Interactive Design Tool

Our CGI's are not just static images, they are interactive tools that help us explore, iterate and refine our designs in real-time. This interactive process is at the heart of our placemaking approach.

Expert Team

Our team continuously innovates to improve efficiency and value, ensuring quick responses to design changes, expanding our design studio services.

Upper Cosmeston Farm, Penarth: Proposed Community Hub

Bringing your projects to life

Latchbrook, Saltash: Central Green

North Cleavelands, Bishops Cleeve: Westfield Character Area

North Cleavelands, Bishops Cleeve: Parklands Character Area

Our CGIs showcase the character and context of proposed developments, enhancing understanding and engagement.

Whether it's promoting new neighbourhoods or illustrating detailed urban spaces, our visualisations breathe life into your projects, making them tangible and compelling.

Woolavington West Strategic Promotion: Aerial View

And we're excited to offer more than just stunning visuals.

Using advanced 3D models, we can now create short animations that highlight key aspects of your projects. These animations can be combined with plans, voice-over commentary, and branding to produce promotional videos perfect for social media and marketing.

A recent example is a video for a site in Woolavington, promoted by Persimmon Homes, which dynamically showcased the scheme's benefits for online audiences.

North Cleavelands, Bishop's Cleeve: Aerial View

East Lancaster: Canal View

Wiltshire: School Building

CGI is now an integral part of our masterplanning.

And we're expanding its use across our other services, such as landscape design and green infrastructure (GI) strategies. As we continue to innovate, our focus remains on delivering high-quality, impactful design outputs for our clients.

Upper Cosmeston Farm, Penarth: Limestone Square

Upper Cosmeston Farm, Penarth: Neighbourhood Centre

Upper Cosmeston Farm, Penarth: Lakeside Crescents

Join us at EDP,
where your
vision meets our
expertise, and
together, we create
places that inspire
and thrive.

We help develop extraordinary
places + people.
